

## KIWOMIX<sup>®</sup> ZL 1058

### Defoaming and levelling agent

KIWOMIX ZL 1058 is an auxiliary product for solvent based, screenable pressure sensitive adhesives. It is used when foaming or levelling disturbances ("fisheyes") occur due to the formulation of the used printing inks together with pressure sensitive adhesives of the KIWOPRINT TC series.

#### APPLICATION

Shake well before use. Mix 1 - 3% with the screenable pressure sensitive adhesive and stir well.

Notice: KIWOMIX ZL 1058 influences the adhesive strength. We do not recommend to add bigger quantities as the bond values can decrease drastically.

---

#### COLOUR

Colourless, slightly milky

#### SOLIDS CONTENT

Approx. 6,8 %

#### FLASH POINT

Approx. +43 °C

#### HEALTH HAZARDS/ ENVIRONMENTAL PROTECTION

Wear protective gloves. Do not breathe fumes. Keep away from sources of ignition – do not smoke. Do not empty into drains and do not dump garbage.

Please follow further information given in the material safety data sheet.

#### STORAGE

2 years (at 20 - 25°C and tightly closed original container)
