

## KIWOMIX<sup>®</sup> ZL 1071

### Alkaline neutralisation agent for circulation units

KIWOMIX ZL 1071 is used for neutralizing acid waste water, e.g. circulation decoating solutions, before leading it into the sewer system.

#### APPLICATION

Add KIWOMIX ZL 1071 carefully to the acid waste water or the used decoater solution until achieving a pH value between 6-8 (monitor with a pH paper or the respective instruments). The quantity to be added depends on the starting value and the quantity of waste water. Notice: when approaching the neutral point, add KIWOMIX ZL 1071 only in small doses.

Ask KIWO for advice.
