

MECOPLUS® 4274 RE-L

Diluting agent and solvent-based cleaning agent for adhesives

MECOPLUS 4274 RE-L may be used to dilute a lot of adhesives. Details for the quantity to be added resp. to the type of adhesives, please see in the technical information of the resp. adhesive. Apart from this, MECOPLUS 4274 RE-L may also be used for the cleaning of adhesive residues as well as brush cleaner.

PROCESSING

As diluting agent: When required please add the amount of MECOPLUS 4274 RE-L, stated in the technical information, into the adhesive and mix it properly or add the diluting agent in portions into the adhesive until the required processing viscosity has been reached.

As cleaning agent: Apply MECOPLUS 4274 RE-L onto a piece of cloth or a cellulose strip and remove with this any adhesive residues. With tenacious stains you might have to repeat the procedure a few times.

Attention: With plastics surfaces, lacquered space and with processing tools prior to the use, MECOPLUS 4274 RE-L has to be checked on its suitability.

COLOUR	colour-less
DENSITY	0,97 g/cm ³ approx.
FLASHPOINT	-45° C approx.
HAZARD ADVISE/ ENVIRONMENTAL PROTECTION	Please note the advices in the safety data sheet.
STORING	2 years (at 20 to 25° C, in the original container)
